

To reuse the cutting liquid in machine tools !

Our APDQO-F removes cutting chips only from the used cutting liquid, and return to the machine tools.

APDQO-F is OUR NEW PRODUCT,
Air type drum clearer with the function to remove
the cutting chips.

The cases we recommend the customers to use:

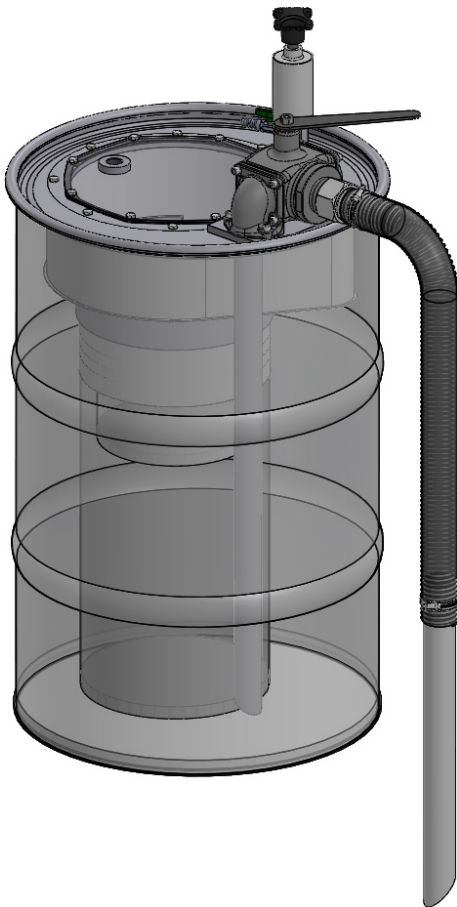

- * In case when the cutting liquid is regularly changed.
- * In case when the cutting chips and/or plunges are removed from the used cutting liquid.

NEW

Possible troubles when the cutting liquid is rotted or degraded

- ① To reduce machining accuracy.
- ② To reduce the life of tools
- ③ To clog pipes and filters by sludge-like materials.
- ④ To cause the rusts on machine tools and products etc.

To secure the quality stable, the regular maintenance for the cutting liquids are really required.

Removal of the cutting chips

Our APDQO-F is a remarkable cleaner with the function to remove the cutting chips and foreign materials from the cutting liquid used at the machine tools.

Our APDQO-F can suck the liquid by air, and, with double construction filter, remove the cutting chips.

Then, the products will return the liquid only to tooling machines.

We do recommend you to try this remarkable cleaner.

【Characteristics】
